## Introduction

### **Diamond Valves - Reliability and Performance You Can Trust**

A successful and efficient processing plant demands the very highest standards of performance from its process equipment.

The Diamond Range of Hygienic Stainless Steel Valves are available from Dairy Pipe Lines (DPL), a company registered to ISO 9001:2015. Our Valves are widely used in many industries such as Food, Dairy, Brewing, Soft Drinks, Cosmetics and Pharmaceutical. DPL and the Diamond brand are well established industry names, with products specified and installed worldwide.

DPL can help you in the following ways:

- Provide technical support and advice to ensure you make the right choice of valve for your application, saving you time and helping to prevent future problems.
- Ensure compatibility with your system by supplying valves with a wide range of end connections.
- Provide you with traceability on parts and spares via dedicated coding on all valves.
- Meet your control requirements - most Diamond valves are available with actuators and switchboxes for central computer control.
- Help you to meet your deadlines by offering fast efficient delivery.

With more than 100 years of experience as a specialist valve manufacturer to numerous sectors of the fluids handling industry, we have gained an enviable reputation for satisfying customer needs promptly. This combined with a high quality, reliable product range and technical help and support ensure that you get the product and the service that you deserve.

**Simply put, we have the expertise to meet your requirements**
