Diamond Actuators & Switchboxes

Actuators

DPL stainless steel actuators are designed to fit quarter turn valves and offer you electronic control.

- Cylindrical, stainless steel construction is corrosion resistant and easily cleaned.
- Compact design offers you space saving.
- Factory lubricated, therefore maintenance free.
- Sealed unit means safe operation.
- Direct mounting onto DPL valves.
- Double acting and spring return versions ensure fail safe options are available.
- Visual indicator fitted to coupling indicates valve position.
- Proven design, random samples tested for 1 million actuations.

Switchboxes

DPL switchboxes fit on DPL manual or actuated valves, if you require remote control or an electrical feedback signal.

- Cylindrical construction is easily cleaned.
- Removable cap for easy wiring.
- IP65 for high protection grade.
- High quality components offer you reliability.
- Wide range of components and voltages tailored to suit your application.
- Pressure relief vent for safe operation.
